1	168. A system for providing electronic programming to a
2	user, the system comprising:
0 ³ $>$	a printed matter having associated therewith at
Q_4	least one sensor, a first controller
7 5	responsive to an actuation of said sensor,
6	and a transmitter responsive to said first
7	controller for transmitting a coded signal;
8	a second controller having associated therewith a
9	receiver for receiving said coded signal;
10	a display unit having associated therewith means
11 A	for accessing programming material, and means
12	for displaying or executing said programming
13	material; and
14	wherein said user actuates said sensor to cause said
15	programming material to be accessed and displayed or
16	executed.
17	
18	169. A system as defined in claim 168 wherein said display
19	unit further has associated therewith a memory means for
20	storing programming material.
21	
22	170. A system as defined in claim 169 wherein said memory
23	means comprises a magnetic disk.

171. A system as defined in claim 169 wherein said memory 1 means comprises a PCMCIA card. 2 172. A system as defined in claim 160 wherein said memory means comprises a flash RAM. 5 6 173. A system as defined in claim 169 wherein said memory means comprises a cache. 8 9 174. A system as defined in claim 169 wherein said memory 10 means comprises a CD-ROM. 175. A system as defined in c laim 169 wherein said memory 13 means comprises a DVD. 14 15 176. A system as defined in claim 169 wherein said memory 16 means is housed on a remote server. 17 18 177. A system as defined in claim 168 wherein said means for 19 accessing programming material operates via a data link. 20 21 178. A system as defined in claim 177 wherein said data link 22 comprises a telephone line. 23

- 3 -

179. A system as defined in claim #177 wherein said data link 1 comprises a computer network. 2 3 180. A system as defined in claim 177 wherein said data link 4 comprises an ISDN network. 5 6 181. A system as defined in claim 177 wherein said data link 7 comprises an ethernet network. 8 9 182. A system as defined in claim 177 wherein said data link 10 comprises a CATV line. 11 12 183. A system as defined in claim 177 wherein said data link 13 comprises a wireless network. 14 15 184. A system as defined in claim 168 wherein said display 16 unit comprises a video display. 17 18 185. A system as defined in claim 168 wherein said display 19 unit comprises an audio transducer. 20 21 186. A system as defined in claim 168 wherein said display 22 unit comprises a flat panel display. 23

187. A system as defined in claim 186 wherein said flat 1 panel display is a rigid flat panel display. 2 3 188. A system as defined in calaim 186 wherein said flat 4 panel display is a flexible #lat panel display. 5 6 189. A system as defined in claim 168 wherein said display 7 unit comprises a CATV converter, or wireless cable 8 converter, and a television set coupled thereto. 9 10 190. A system as defined in claim 168 wherein said display 11 unit comprises a personal computer system. 13 191. A system as defined in claim 168 wherein said display 14 unit comprises a portable personal computer system. 15 16 192. A system as defined in claim 168 wherein said display 17 unit comprises a personal digital assistant. 18 19 193. A system as defined in claim 168 wherein said display 20 unit comprises an Internet appliance. 21 22 194. A system as defined in claim 168 wherein said display 23

	unit comprises a cellular telephone.	
. 2	unit comprises a cerrural terephone.	
	195. A system as defined in claim 168 wherein said display	
3		
4	unit comprises a wireless communication device.	
5		
6	196. A system as defined in claim 168 wherein said	
7	programming material is accessed via a network.	
8		
9	197. A system as defined in claim 196 wherein said network	
10	comprises a wireless network	
12	198. A system as defined in claim 168 wherein said	
13	programming material is accessed via the Internet.	
14		
15	199. A system for displaying programming to a user, the	
16	system comprising:	
17	a printed matter having at least one recognizable	
18	feature;	
19	a feature recognition unit having associated	
20	therewith means for recognizing said feature	
21	and a transmitter for transmitting a coded	
22	signal in response to said recognizing;	
23	an intelligent controller having associated	
	- 6 -	

٠	
	· /
1	therewith a receiver for receiving said coded
2	signal and means for accessing programming
3	material; and
4	a display unit for displaying said programming
5	material;
6	wherein said recognition unit, in response to said
7	recognizing, causes said intelligent controller to access
8	said programming material and said display unit to execute
9	or display said programming material.
10	
13	200. A system as defined in claim 199 wherein said
12	recognizable feature comprises a magnetic code.
13	
14	201. A system as defined in claim 199 wherein said
	recognizable feature comprises a series of alphanumeric
16	characters.
17	
18	202. A system as defined in claim 199 wherein said
19	recognizable feature comprises a representation of a word or
20	sound.
21	
22	203. A system as defined in claim 199 wherein said.
23	recognizable feature comprises a barcode.

204. A system as defined in claim 194 wherein said 1 recognizable feature comprises a symbol. 2 3 205. A system as defined in claim 199 wherein said 4 recognizable feature comprises a Aigital watermark. 5 6 206. A system as defined in claim 199 wherein said 7 recognizable feature comprises a code. 8 9 207. A system as defined in /claim 199 wherein said 10 recognition means comprises a scanner. 11 12 208. A system as defined in claim 199 wherein said 13 recognition means comprises a magnetic strip reader. 14 15 209. A system as defined in claim 199 wherein said 16 recognition means comprises a voice recognition device. 17 18 210. A system as defined in claim 199 wherein said 19 recognition means comprises a CCD camera. 20 21 211. A system as defined in claim 199 wherein said 22 recognition means comprises a digital PC camera. 23

1	212. A system as defined in claim 199 wherein said
2	recognition means comprises a keyboard.
3	
4	213. A system as defined in claim 199 wherein said
5	recognition means comprises a mechanical mouse device.
6	
7	214. A system as defined in claim 199 wherein said
8	recognition means comprises an optical or digital mouse
9	device.
LO	
11 ()	215. A system as defined in claim 199 wherein said
12	recognition means comprises a digital watermark reader.
L3	
L4 ·	216. A system as defined in claim 199 wherein said display
15	unit comprises a video display.
16	
۱7	217. A system as defined in claim 199 wherein said display
18	unit comprises an audio transducer.
19	
20	218. A system as defined in claim 199 wherein said display
21	unit comprises a flat panel display.
22	
23	219. A system as defined in claim 218 wherein said flat
	- 9 -

1	panel display is a rigid flat panel display.
2	
3	220. A system as defined in claim 218 wherein said flat
4	panel display is a flexible flat panel display.
5.	
6	221. A system as defined in claim 218 wherein said flat
7	panel display is embedded in the printed material.
8	
9	222. A system as defined in claim 199 wherein said display
10	unit has associated therewith a buffer for temporarily
11	storing programming material.
12	
13	223. A system as defined in claim 199 wherein said display
14	unit has associated therewith means for decompressing
15	compressed programming material.
16	
17	224. A system as defined in claim 199 wherein said display
18	unit comprises a CATV converter, or wireless cable
19	converter, and a television set coupled thereto.
20	
21 ,	225. A system as defined in claim 199 wherein said display
22	unit comprises a personal computer system.
23	1

226. A system as defined in claim 225/wherein said personal 1 . computer system includes means for decompressing compressed 2 material. 3 4 227. A system as defined in claim 199 wherein said display 5 unit comprises a portable personal computer system. 6 7 228. A system as defined in claim 199 wherein said display 8 unit comprises a personal digital assistant. 9 10 229. A system as defined in claim 199 wherein said display 12 unit comprises an Internet appliance. 13 230. A system as defined in claim 199 wherein said display 14 unit comprises a/cellular telephone. 15 16 231. A system/as defined in claim 199 wherein said display 17 unit comprisés a wireless communication device. 18 19 232. A system as defined in claim 199 wherein said system 20 further comprises a storage device for storing programming 21 material 22 23

233. A system as defined in claim 232/wherein said storage 1 device comprises a CD-ROM. 2 3 234. A system as defined in claim 232 wherein said storage 4 device comprises a DVD. 5 6 235. A system as defined in claim 199 wherein said memory means is housed on a remote server. 8 9 236. A system as defined/in claim 199 wherein said means for 10 accessing programming material operates via a data link. 11 12 237. A system as defined in claim 236 wherein said data link 13 comprises a telephone line. 14 15 238. A system as defined in claim 236 wherein said data link 16 comprises a computer network. 17 18 239. A system as defined in claim 236 wherein said data link 19 comprises an ISDN network. 20 21 240. A system as defined in claim 236 wherein said data link 22 comprises an ethernet network. 23

241. A system as defined in claim 236 wherein said data link 1 comprises a CATV line. 2 3 242. A system as defined in #laim 236 wherein said data link comprises a wireless network. 5 6 243. A system as defined in claim 199 wherein said 7 programming material is accessed via a network. 9 244. A system as defined in claim 243 wherein said network 10 comprises a wireless network. 11 12 245. A system as defined in claim 199 wherein said 13

programming material is accessed via the Internet.

14
